
Audi A1 Sportback – Suspension with controlled damping

The axle design of the new Audi A1 Sportback delivers agile handling and a sporty, poised driving experience. Besides the basic suspension, there is an option for a tauter sport suspension.

Dynamic packages, individually configured for every engine version, bundle equipment options to give the A1 Sportback an even sportier trim. For the entry-level gasoline engine, the “Basis” dynamic package includes a sport suspension, red brake calipers and larger brake discs. Audi offers the “Performance” dynamic package for the other engine versions. This also includes red brake calipers and larger brake discs as well as a suspension with adjustable dampers, a sound actuator and Audi drive select.
