Audi Q2 side assist

The lane change assistant Audi side assist is active at speeds of 15 km/h *(9.3 mph)* and above. It uses two rear-mounted radar sensors with a scanning range of roughly 70 meters *(229.7 ft)*. If a vehicle is located in the blind spot or approaches rapidly, a warning LED in the housing of the respective exterior mirror lights up. If the driver still operates the turn signal, the LED flashes brightly several times in succession.
