
Audi A3 Sportback – Assistance functions

Well versed: the driver assist systems

Equipped with Audi pre sense front, swerve assist and lane departure warning, the A3 Sportback helps prevent accidents with other road users and offers a high level of safety as standard.

Further assist systems, such as the lane change and exit warnings as well as the cross-traffic and park assist systems, are available as an option. The adaptive cruise assist, which customers know from many of the full-size models, assists with longitudinal and lateral guidance. It maintains the speed and distance to the vehicle in front and assists with lane guidance by means of gentle interventions in the electromechanical steering. This increases the level of driving comfort during long journeys in particular.
