

Audi A8 – Remote park assist plus

There are about 40 driver assistance systems available in the enhanced Audi A8. Some of them – including the Audi pre sense basic and Audi pre sense front safety systems – are standard equipment for the series. Options are clustered into the “Park,” “City,” and “Tour” packages. The assistance package plus consolidates the packages. Features like the night vision assistant and surround view cameras are available separately. The highlight of the “Park” package is the remote park assist plus, which can automatically maneuver the large sedan into and out of a parallel or bay parking space. The driver does not even need to be in the car for it to do that.
