Audi Q6 e-tron – Recuperation and brake blending

This technical animation shows the function of brake blending and recuperation in the Audi Q6 e-tron. Around 95 percent of all braking processes in everyday driving can be covered by recuperation and thus contribute to the efficeincy and range of the vehicle.

Audi Q6 e-tron quattro: Combined power consumption in kWh/100 km: 19.6 -17.0 (WLTP); CO2 emissions combined in g/km: 0; CO2-class A
