
Audi A6 allroad – 3.0 V6 TDI with MHEV plus technology and plug-in hybrid

Fuel-efficient and high-performance: MHEV plus technology

At its launch, the new A6 Avant* will be available with three different engines – two gasoline and one diesel. Two of these three power units will feature mild hybrid technology (MHEV plus) and are therefore partially electrified.

The MHEV plus system supports the combustion-engine vehicle, enhances performance and ride quality, and reduces CO
